

## PROPER CITATION OF AIR AND SPACE CRAFT TYPES FROM NASM ARCHIVES SOURCES

When completing a **Document Use and Indemnification Agreement**, it is important to properly cite the model designation for any drawings or other documents which you will be receiving from the NASM Archives. For materials from many of our collections, the proper citation will simply be a manufacturer and model or models. For drawings from the **Waco Aircraft Company Drawings Collection** for example, indicate the specific model or models for which you are requesting drawings: *Waco PDC, Waco YPF-7, Waco 9.*

Several of our large collections are not as straightforward, however. In these collections, one unit of material (such as one drawing sheet or one reel of microfilm) often pertains to a number of different aircraft models. **Although you might be interested in only ONE model appearing in the material, for legal purposes you must cite ALL models included in the material which you would like to receive. DO NOT LIST THE ITEM NUMBERS of the material you are ordering.**

Two examples are given below.

Engineering drawings on microfilm: Custom search printout			
<b>Inactive Contractor's Drawings</b> ( Ryan Aeronautical Co
