Space Telescope History Project 3.70 cu. ft. (20 boxes)

Historical Note

This collection contains the interviews for the Space Telescope History Project. These interviews examine the early planning and development of what would eventually be known as the Hubble Space Telescope (HST). The period covered is from the 1970s into the 1980s. This project constitutes one of several oral history projects carried out within the National Air and Space Museum's (NASM) Department of Space History. This interview set consists of over 235 hours of interviews with 94 individuals. Please note that there are a few instances where audio cassette tapes of the interview subjects exist but without written transcripts while there are a few cases of existing transcripts of the interviews without any audio cassette tapes. Those interviewed include astronomers, scientists, engineers, as well as administrators, all of whom were involved in the space telescope project. The following were interviewed for this project: Bob Adams, Ken Ando, Marcel Aucremanne, John N. Bahcall, Neta Bahcall, William Baum, Michael J.S. Belton, Marc Bensimon, Livingston Biddle, Robert C. Bless, Greg Boeshaar, Albert Boggess, III, John Brandt, Robert A. Brown, Bert Bulkin, Margaret E. Burbridge, J.J. Caldwell, Frank Carr, Clark R. Chapman, John Clark, Art Code, Frank V. Scope and Content Note

The Space Telescope History Project is arranged alphabetically by interviewee. The audio cassette tapes of these interviews have yet to be remastered and, due to their fragility, are not available to researchers. Transcripts of interviews are available to researchers though, there are restrictions placed on a number of them. A NASM staff member will advise the patron which transcripts are available for copying and/or viewing and how to order copies of transcripts. Transcripts with user restrictions are highlighted in **bold** type.

CONTAINER LIST

The Space Telescope History History Project interviews are arranged alphabetically by interviewee. Boxes 1-14 contain interviews on audio cassette tapes. These tapes have yet to be remastered and, due to their fragility, are not available to researchers. Boxes 15-20 contain the transcripts for these cassette tapes. Most of these transcripts are available to researchers though, restrictions are placed on a small number of them. Transcripts with user restrictions are highlighted in **bold** type.
