Processing Information

File unit titles are original except in cases of titles appearing in brackets which are the processing archivists'.

Series and subseries was determined by the archivist based on existing groupings.

Gerard O'Neill was highly organized with his papers and that organization has been preserved. Almost all folders were labeled by Dr. O'Neill though in a few cases original labels had dried up and fallen off. Some later folders appeared to be labeled by someone else. Commonly, there were hanging folders that served to group together individual folders. In these cases, the file units are named after the hanging folder's broader title and the individual folders are physically reproduced on acid-free paper within the file unit's contents.

Biographical Note

Gerard Kitchen O'Neill (1927-1992) was an experimental physicist, educator, inventor, entrepreneur, writer and novelist.

Gerard K. O'Neill joined the Navy at age 17, served as a radar technician from 1944 to 1946, graduated from Swarthmore College in 1950 with high honors in Physics, and received his Ph.D. in Physics from Cornell University in 1954. He went to Princeton University in that year as an Assistant Professor, becoming a Full Professor of Physics in 1965. In the 1976-77 academic year he received the honor of serving as the Jerome Clarke Hunsaker Professor of Aerospace at the Massachusetts Institute of Technology. He retired from Princeton in 1985 as professor emeritus.

Dr. O'Neill's main research area was high-energy particle physics and he initiated and led large-scale projects in accelerator construction. In 1956 he invented the storage-ring technique for colliding particle beams, a method which is now the basis for nearly every new high-energy particle accelerator. In 1976 he built his first Mass Driver prototype.

Dr. O'Neill was a pioneer in the field of space colonization; his studies on the humanization of space began in 1969 as a result of his undergraduate teaching at Princeton, and one of his four books, *The High Frontier*, detailed his vision of humanity's movement into Earth-like habitats constructed in space. *The High Frontier* won the Phi Beta Kappa Award as the best science book of 1977. He also authored *2081: A Hopeful View of the Human Future*, *The Technology Edge: Opportunities for America in World Competition* and co-authored a graduate textbook, *Introduction to Elementary Particle Physics*.

In 1977 following the success of *The High Frontier*, Dr. O'Neill founded the non-profit Space Studies Institute. SSI's research included work on mass drivers and the Lunar Polar Probe (renamed Lunar Prospector and flown by NASA.)

In 1967 Dr. O'Neill was a finalist, though ultimately not selected, for NASA's Astronaut Group 6, a group of scientist-astronauts to be given assignments in the Apollo Program. He returned to NASA throughout 1975-1977 to led studies on space habitats and space manufacturing; he testified twice before Congress during that time. In 1985, he was appointed by President Reagan to the National Commission on Space.

In 1983 Dr. O'Neill founded the Geostar Corporation, a satellite based positioning and communication system, based on a patent issued to him.

In 1986, O'Neill founded O'Neill Communications, Inc. which developed LAWN, a local area network device using radio waves and still in use today.

At the time of his death, Dr. O'Neill was working on a form of high-speed ground-based transportation he called "Magnetic Flight" with another company he founded, VSE International.

Dr. O'Neill was an instrument-rated pilot with some 2,500 hours of time in powered aircraft and held the Triple Diamond Badge of the Federation of the Aeronautique Internationale for sail plane flights. He was active in ultralight aircraft aviation and a member of the Experimental Aircraft Association. On most of his travels in connection with research and lectures, he piloted his own small plane.

Dr. O'Neill died from leukemia in 1992; the Clementine Mission of 1994 was dedicated to him.

Scope and Content Note

Materials in this collection include notes, business papers, patents, calendar planners, reports, a thesis, correspondence, book drafts, screenplay drafts, university publications, magazines, magazine articles, newspaper articles, glass & 35mm images, photographs, a rolodex.

The researcher should note that the collection also contains VHS tapes and audio cassettes. These items are not included in the container list but a NASM Archives staff person can assist you regarding access.

Arrangement

Organized into 5 series:

- Series 1: Professional Papers
- Series 2: Publications & Reports
- Series 3: Personal Papers
- Series 4: Images
- Series 5: Odd & Oversize

Names and Subject Terms

This collection is indexed in the online catalog of the Smithsonian Institution under the following terms:

Subjects:

Astronautics
Books
GPS receivers
Gliders (Aeronautics)
Physics
Satellites
Space colonies
Space sciences
Space stations

Types of Materials:

Book drafts
Clippings
Correspondence
Magazines (periodicals)--20th century
Movie scripts

Geographic Names:

Moon--Exploration

Container Listing

Series 1: Professional Papers, 1940s-1993

55 boxes; Box 1-55

1.1: Academia, 1940s-1983

1.1.1: Academic Research, 1940s-1981

These materials were grouped together by the creator; file unit names are the creator's unless in brackets, which signifies that the processing archivist named the file unit. Processing archivist arranged file units chronologically.

Box 1, Folder 1	Physics I Lab Notes, 1940s
Box 1, Folder 2-4	[Gerard O'Neill, Student], 1940s-1950s <i>3 folders</i> Notes, notebooks, quizzes, papers, handouts.
Box 1, Folder 5	[Newburgh Free Academy Diploma], 1944
Box 1, Folder 6	CBX [Colliding Beam Experiment] Run Notebook, 1949-1963
Box 1, Folder 7-9	1960s Work on Storage Rings, 1949-1967 <i>3 folders</i> Includes drawings.
Box 2, Folder 1	[Swarthmore College Commencement Materials], 1950
Box 2, Folder 2	Princeton - Stamford Experiment [Colliding Beam Experiment], 1951-1965
Box 2, Folder 3	[<i>Time of Flight Measurements on the Inelastic Scattering of 14.8 MEV Neutrons</i> - Gerard O'Neill's Thesis], 1954
Box 2, Folder 4	[Russian Language Study Notebook], circa 1955?
Box 2, Folder 5-6	1950's Work on Storage Rings [Notebook], 1956 <i>2 folders</i>
Box 2, Folder 7-8	1950's Work on Storage Rings, 1956-1985 Correspondence, articles, essays, photo and publications: <i>Nucleus</i> 1962; <i>Scientific American</i> 1966.
Box 2, Folder 9	[<i>Series of Selected Papers in Physics - Electronics in Nuclear Physics</i> published by the Physical Society of Japan], 1957 Contains Gerard O'Neill's "Direct Reading Analyzer for Short Time Intervals" reprinted from <i>The Review of Scientific Instruments</i> , 1955.
Box 2, Folder 10	[<i>The Physical Review</i> Vol.115 No.3], 1959 With "Intersecting-Beam Systems with Storage Rings" by Gerard O'Neill and E.J. Woods.

Box 3, Folder 1	[Drawing : "Proposed Plot Plan of New Prin-Penn Accelerator"], 1956
Box 3, Folder 2-4	Colliding Beam Experiment (CBX) Notebooks, 1963-1964 <i>3 folders</i>
Box 3, Folder 5	CBX [Colliding Beam Experiment] - Run Data & Detector Notes, 1963-1964 Includes photos.
Box 3, Folder 6	Princeton - Office of Public Information, 1965 Press releases, newspaper articles on Colliding Beam Experiment.
Box 3, Folder 7	[Papers/Presentations re: Colliding Beam Experiment], 1966-1970
Box 3, Folder 8-9	CBX [Colliding Beam Experiment] Correspondence with University, 1975-1981
Box 4, Folder 1	Proposal Sections & Copies, UNDATED
Box 4, Folder 2	Reports by Federbush, UNDATED

1.1.2: Teaching Materials, 1973-1983

These materials were grouped together by the creator; file unit names are the creator's unless in brackets, which signifies that the processing archivist named the file unit. Processing archivist arranged file units chronologically.

Box 4, Folder 3	Reference Articles - Physics III - II2, 1973-1981
Box 4, Folder 4	Physics III/II2 General Info from Earlier Years, 1979-1980
Box 4, Folder 5	Physics III Lectures & Quizzes 1979-80, 1979-1980 Contains transparency and color slide.
Box 4, Folder 6	Physics II2 1979-80, 1979-1980
Box 4, Folder 7	Source Material, 1980
Box 4, Folder 8	Physics III 1980-81, 1980-1981
Box 4, Folder 9	Lectures 1982-3, 1980-1983
Box 4, Folder 10	Physics II2 1980-1, 1981-1983
Box 5, Folder 1	Physics III & Physics II2 1982-3 Term Paper Topics, 1981-1983
Box 5, Folder 2	Course Meetings, 1982-1983
Box 5, Folder 3	Physics III - Physics II2 1982-3, 1982-1983
Box 5, Folder 4	[Physics Class Material - Miscellaneous], 1982-1983
Box 5, Folder 5	Quizzes & Practice Problems Current Course, 1982-1983

- Box 5, Folder 6 [Physics III 1982-3], 1982-1983
- Box 5, Folder 7 Syllabus & Organiz., 1983
- Box 5, Folder 8 Physics II2 Labs, 1983

1.2: Historical Documents, 1964-1977

These materials were grouped together by the creator and given the group title of "Historical Documents;" file unit names are the creator's unless in brackets, which signifies that the processing archivist named the file unit. Processing archivist arranged file units chronologically.

- Box 5, Folder 9 Info & Documents Picked Up in Course of Astronaut-Selection Process, 1964-1971
- Box 6, Folder 1-2 Notes & Refs. in Prep of *Science* Article on Composite Orbiting Telescope, 1966-1968
2 folders
- Box 6, Folder 3 Work & Travel Records, 1968
- Box 6, Folder 4 [Historical Documents, Miscellaneous], 1972-1973
- Box 6, Folder 5 Purcell Letter - Original, 1974
Correspondence to Prof. E. Purcell from Gerard O'Neill re: space colonies.
- Box 6, Folder 6 Press Package - Originals, 1974
- Box 6, Folder 7 Living in Space, 1977

1.3: Mass Driver, 1971-1982

These materials were grouped together by the creator and given the group title of "Mass Driver;" file unit names are the creator's unless in brackets, which signifies that the processing archivist named the file unit. Processing archivist arranged file units chronologically.

- Box 6, Folder 8-10 [Mass Driver Miscellanous], 1971-1981
2 folders
- Box 6, Folder 11 Mass Driver Notes - Gerard O'Neill, 1973-1981
- Box 7, Folder 1 MDRE / Ion Drive Comparison, 1974-1979
- Box 7, Folder 2 Second Mass Driver Model Including Work Notes & Correspondence with Students, 1977-1978

Box 7, Folder 3	Mass Driver Meetings 5/24/78 (PTN) & 6/20/78 (LERC), 1977-1978
Box 7, Folder 4	Working Notes Autumn 1977, 1977-1978
Box 7, Folder 5	Mass Driver Briefing, 1978
Box 7, Folder 6	Mass Driver Working Notes 1978, 1978-1979
Box 7, Folder 7	Mass Driver Design & Mission Performance, 1979-1980 Contains notes, color slide and viewgraphs.
Box 7, Folder 8	Mass Driver Calc NS & Briefing Notes, 1980-1981
Box 7, Folder 9	6/81 High Alpha Mass Driver Model, 1980-1981
Box 7, Folder 10	Mass Driver Funding, 1980-1981
Box 7, Folder 11	Essential Mass Driver Notes, 1980-1982
Box 8, Folder 1	M3 Notes, 1980-1982 Original folder label in its entirety read "M3 Notes 1982 (Mainly Development of M3 & M31.) Includes Some Earlier."
Box 8, Folder 2	To/From R. Muratore (Summer 1981), 1981
Box 8, Folder 3	Mass Driver Reprints 1981 & After, & Bibliography, 1981
Box 8, Folder 4	Mass Driver Wave Calculation, 1981
Box 8, Folder 5	M3 Mass Driver Programs into 1982, 1981-1982
Box 8, Folder 6	Mass Driver Calculations, 1981-1982
Box 8, Folder 7	To/From L. Snively, 1982
Box 8, Folder 8	Viewgraphs (Mass Driver), UNDATED
Box 8, Folder 9	[Viewgraphs], UNDATED Identified as "Viewgraphs for Sept. 6-12 IAF Meeting in Rome."
Box 8, Folder 10	Grover Tables, UNDATED

1.4: Companies, 1945-1992

Arranged in order of the company's founding.

1.4.1: Space Studies Institute (SSI), 1973-1988

These materials appear to have been grouped together by the creator and were received in boxes labeled "Files from SSI" by the donor; file unit names are the creator's and someone unknown; when in brackets, the processing archivist named the file unit. Processing archivist arranged file units chronologically.

Box 8, Folder 11	Gerard O'Neill: Space Studies Institute. Miscellaneous, 1973, 1984-1986
Box 8, Folder 12	Space Studies Institute: Miscellaneous Correspondence to Gerard O'Neill , 1976, 1986
Box 8; 9, Folder 13; 1	[Space Studies Institute Miscellaneous], 1977-1995 <i>2 folders</i> Includes correspondence, book dedications, articles, interview transcripts, meeting minutes, patent applications.
Box 9, Folder 2	Patent Application for Space Studies Institute, 1979
Box 9, Folder 3	Space Studies Institute, Non-Articles, But to Keep at Home. Not Chrono, 1980-1989
