

Our astronaut is not ready for her spacewalk. Can you help suit her up?

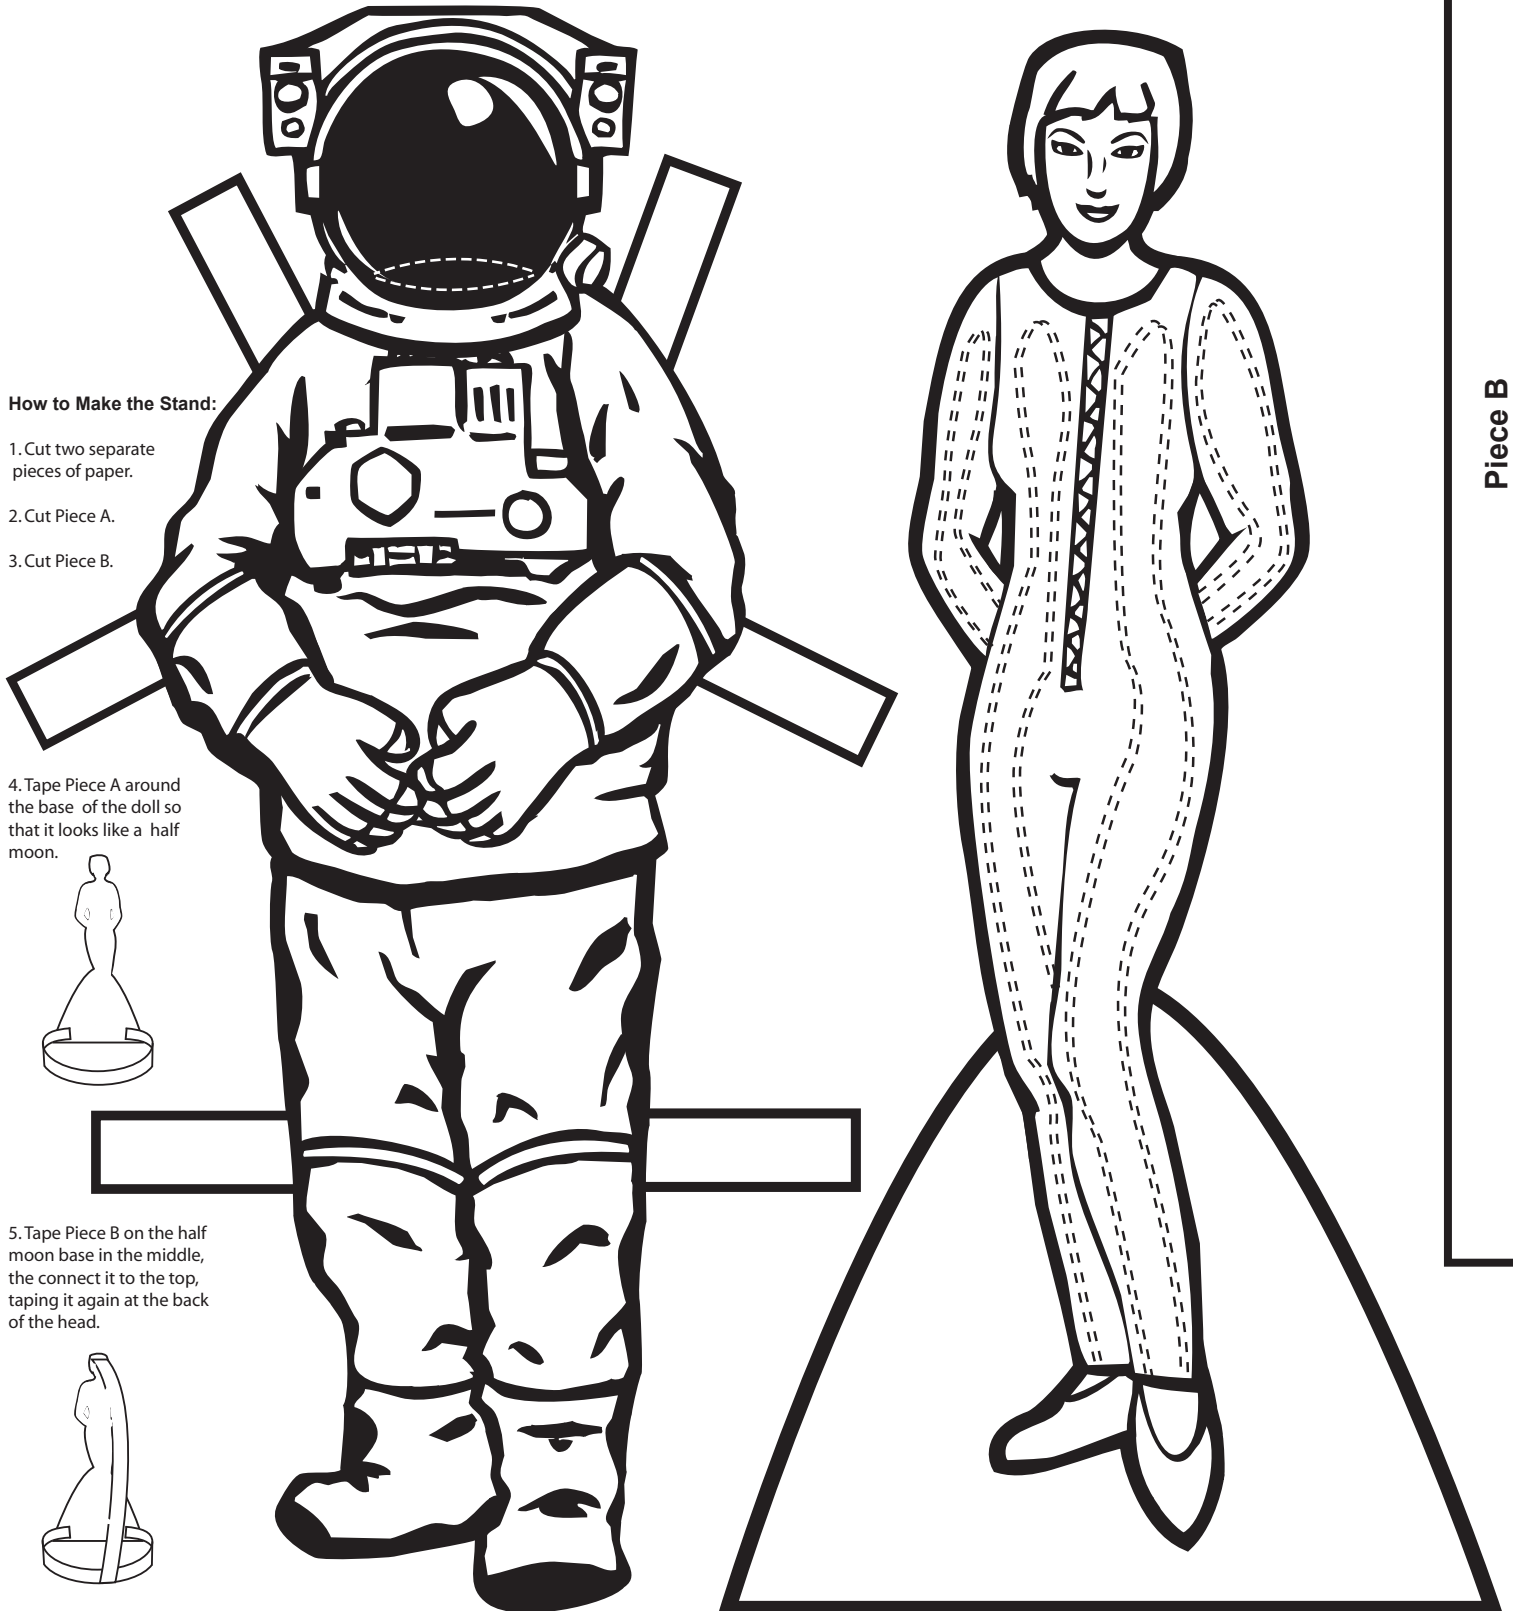

Directions: First, color each layer of the spacesuit. Then, carefully cut each layer. Finally, tape each layer to the cardstock astronaut in the appropriate order.

Cut One:

The Extravehicular Mobility Unit (EMU) protects the astronaut on their spacewalk.

Cut Two:

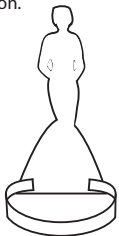

The Liquid Cooling Garment is one of the first layers worn to maintain body temperature.

How to Make the Stand:

1. Cut two separate pieces of paper.
2. Cut Piece A.
3. Cut Piece B.

4. Tape Piece A around the base of the doll so that it looks like a half moon.

5. Tape Piece B on the half moon base in the middle, then connect it to the top, taping it again at the back of the head.

Piece B
